ABOUT US

Our unique group of companies, offer a one stop solution for supporting ground, sea and aviation platforms.

The group offer 100 years of combined military support, technical data and engineering solutions serving governments. Since the 1980s our group offers support of physical stock of over 100 Million components housed in 45k sq. Feet storage and reverse engineering solution's

Don't let obsolescence ground your equipment!

STOCK

With 45000sq ft storage we hold over 100 million components!

INNOVATION

Our modern supply chain system, creative thinking and reverse engineering can offer you hard to find parts

EXPERTISE

With over 100 years combined experience we have knowledge in electronic, industrial, mechanical , military and naval parts

RELATIONSHIPS

Long established relationships and contacts with major suppliers and thousands of retail and commercial customers

RELIABILITY

Ready to ship anywhere in the world efficiently with great customer service and multiple international agents

CERTIFIED

All our products are certified genuine and testing can be arranged

In August 1946 BRITISH SAROZAL LTD (BSL) was incorporated as an export distributor for General Motors Lease Lend vehicles and ancillary equipment, which remained in the U.K. after the war. The company grew rapidly and from 1949 concentrated on marketing communications and radar equipment to buyers outside the U.K

BSL became qualified with the BS 5750, which was more general manufacturing orientated, this changed to the International Standard of ISO 9000.

BSL express spares has continued to grow up to the present day with the accumulation of stock, technical and commercial expertise.

We pride ourselves on being reliable and ready to assist with your enquiry while offering competitive prices.

BSL are also registered as the supplier and manufacturer of 15,500 Nato/NSN part numbers.

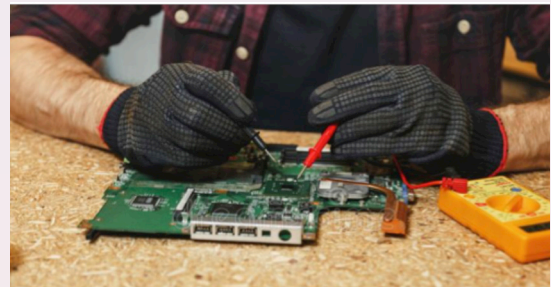

Cage Code U0F31

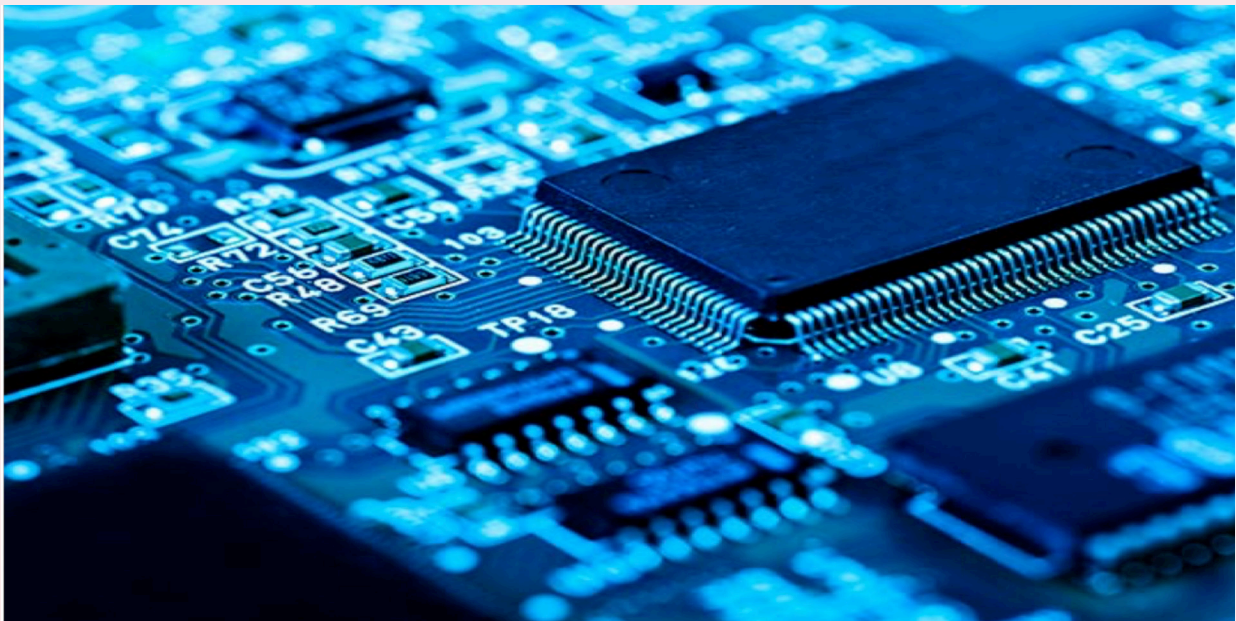

Originally established as Chelmer Valve Co Ltd in 1961, the company specialised in audio vacuum tubes and transmitter valves. The company's focus then shifted to hard-to-find obsolete electronic components coupled with a name change in 2018.

CVC Components Ltd now have accumulated one of the largest stocks of Legacy spares in the UK and a huge data library. With millions of Commercial, Military and Legacy spares at their purpose-built facility in Chelmsford, we have an ever-growing stock of hard to find and obsolete electronic, mechanical spares for ground and air-based platforms.

Our team have worked hard over 50 years to proudly gain the company a reputation built on reliability, genuine knowledge about the industry and the equipment used, and of course a good understanding of the industries we supply to. If the item you require is unavailable in our inventory, our highly experienced team are able to source hard to find and obsolete parts as well as common spares to fulfil your requirements.

Cage Code U9372

Defence Support International Ltd's day to day activities involve supplying spare parts and project managing repair activities on behalf of our customers, especially for the UK Royal Navy directly or indirectly via BAE Systems Surface Ships Ltd (formerly VT, Vosper Thornycroft) Babcock International Group and British Army via Donnington.

For BAE Systems we are a JOSCAR approved supplier and support the following Royal Navy vessel classes QEC Carriers, Type 45 Destroyers, Type 23 Frigates and Hunt Class Mine Counter Measure vessels as well as the Saudi Arabian Sandown Single Role Mine Hunters (SRMH).

We also have a 4-year framework agreement to support the Estonian Navies ex Royal Navy Sandown (SRMH) where again we supply spares and project manage repairs. Other overseas naval customers include Brazil, Chile, France, Italy and Pakistan.

We have an extensive database of NATO Stock Numbers, manufacturer's catalogues, UK Defence Standards, Naval Standards and British Standards which allow us to address the main problems of legacy equipment, i.e. obsolescence.

The company holds ISO 9001:2015 approval and our staff are trained in IATA hazard packaging and all MOD standards of packaging (including the special requirements for minesweepers). We will provide repackaging to any primary packaged quantity and can bar code packages as required.

Cage Code KA733

FEL AVIONICS

Founded in 1976, Fel Avionics Ltd was originally marketed as an inventory service for the benefit of prime UK defense contracts.

The world's largest stockist of Plessey/BAE Radar parts: 1000's of new surplus spares, TWT test facility and worldwide engineering support. Our engineers will travel to site, evaluate and repair alongside a 1-5-year support package. Conscious of the demand, we at Fel Avionics Ltd offer support to our customers on a daily basis.

With its own BAE/Plessey Radar Test Facility; stockist and distributor of electrical/mechanical components and subsystems with particular emphasis on products previously manufactured by GEC Marconi Defence Systems, Plessey Defence Systema, Racal Decca, Marine etc.

Focused on long-term development, the company has progressively added to its product range and expertise accordingly.

Cage Code U9259

SERVICES AND CAPABILITIES

Design and Manufacture of New Replacement Equipment

- Redesign service for old or obsolete units
- Custom ceramic Zirconia/ Alumina products – including highvoltage feed throughs
- Re-manufacture of magnetic and catching relays
- Integrated circuit testing/HFE component matching
- Non-Destructive semiconductor/ IC testing
- Electron Tube (TWT, Magnetron) Testing
- Replate TWT technology into solid state technology for radar systems
- Replace/Repair Radar Subsystems

Reverse Engineering Services

- Rebuilding spares from customer samples
- Modernize / Redesign PCBs
- Full inhouse turnkey solutions
- Rebuild multilayer PCB's, up to 8 layers

Test and Repair Services

- RF and Microwave assemblies in the range (1MHz to 10GHz)
- Power supply and Control equipment (LV, HV, and EHT)
- Analogue and Digital PCBs
- Interconnection (Backplanes, Cable looms, etc)
